ABOUT US

PRECISION PRINTING TECHNOLOGY

Precision printing is inspired by photography and materials from environment. Our technology reproduces every detail, even the fine lines that are too small for the naked eye. The rich tones and exquisite beauty created by advanced technology are what set design ADAWALL apart from the rest. In order to capture the detail in our original drawings and re-create them as wall paper, our designs are printed using the grayure technique, which is a world class printing method for achieving maximum detail and tone.

100 % PURE WATER BASED INKS

High quality and precise printing begins with the finest ingredients. Water based inks from Netherlands and Korea realize superb color reproduction plus environment friendly manufacture. What completes 100 % pure water based inks is the GSE color dispenser, which provides optimized dispensing solutions.

CYLINDERS DESIGNED TO DELIVER PINPOINT ACCURACY

Precision printing can only be utilized with precisely engraved print cylinders that replicate even the minutest details. Embossing sheets of nonwoven and paper back using a steel emboss roller and paper ball work in conjunction with each other,

STRICT QUALITY CONTROL SYSTEM

ADAWALL's extensive expertise in quality management enables the production of the World's Finest Products. The process of quality is supported by specialized line inspector. Specialized line inspectors are check at key sections to support the process of quality management, which is capped by a rigorous final inspection. All the finished products are put to test and trial application.

ENVIRONMENTAL RESPONSIBILITY

At the ADAWALL factory, we are aware of our responsibilities to the environment and also we are wholly committed to improving manufacturing processes in line with this. We choose to work only with ethical and accredited suppliers' products and we make business decisions based on the impact on the wider, global environment. The selection of ingredients is critical in creating a truly premium product too,

POSTER (MURAL) INSTALLING INSTRUCTIONS

1. Checking the product

Check the panel number and pattern before applying the wallpaper adhesive. First, lay panels face down on a flat surface and ensure the panel patterns match with each other. Then, apply the achesive at the back side of wallpaper.

3. Trimming the joining Edges Use a straight edge and

2. Applying The Product

After you make sure the first and the second panel overlap all joining edges by 0.3mm or 0.7mm. start installing the product. (Repeat steps for remaining panels)

4. Completing The Installation

Apply the panel onto the wall using a soft dry cloth or a rubber squeegee. Work from top to bottom taking extra care not to overwork each panel.

Do not forget to overlap parts during application. The pattern will not fit if you butt the products. After the application, cut the middle of the intersecting part of the two pieces, remove the small places cut and the picture is completed.

USEFUL TIPS FOR THE INSTALLATION

- 1. Make sure the wall surface is clean and smooth.
- 2. During the installation.

the adhesive must be evenly applied between the wall and the product by using a spud of a brush.

- 3. After wallpaper adhesive, installation of the product must be finished in 10-20 min.
- 4. Since the placement of the first panel determines the overall look of the finished mural, take extra time and care to place in accurately. Use a level and a plumb line.
- 5. First, make sure the second pattern overlaps the first one on the joining edges by approximately 0.3mm-0.7mm. Then hang the remaining panel.
- 6. Take extra care to make sure not to get adhesive on the patterned side whilst joining the edges.
- Hard objects like spuds and rollers can harm the surface of the product. They must be used with extra care.
- 7. The backside of the product is nonwoven paper and is produced in 105cm width. Special order in different designs is available.
