WALL MURALS

Mural / Poster

1. Select panel number 1.

2. Lay panel face down on a flat surface. Apply the wallpaper paste evenly to the back of the panel, allow the paste to soak for 5 - 10 minutes, do not lay the pasted sheets on the top of each other. It is very important to take extra care to make sure paste is applied to the edges. Try not to get paste on the printed side, apply the panel on to the wall using a soft cloth. Work from top to bottom and left to right taking extra care not to overwork each panel. If one of the panels gets too wet or overworked by repositioning, it will stretch and make lining up the pattern most difficult.

3. Carefully remove excess paste from the front of the poster using a soft cloth. Too much rubbing or cleaning will remove the ink from the paper.

4. Repeat steps for remaining panels, following the printed guidelines on each panel overlap all joining edges by approximately 5 - 8mm. It is common for each panel of a wet poster to be around 106cm, larger than a dry panel of the poster as each panel expands once paste is applied.

5. Trim the excess edges (5 - 8mm) carefully when you stick 2nd panel and remain panels.

A NEW GENERATION OF NON-WOVEN WALL MURALS

Decorate your wall with the latest trends in fashion, art, design and architecture. **Moneta** non-woven wall murals are very easy to affix:

- Standard panel size: Width 105cm X Height 280cm

- The thickness of the sheets (0,30-0.40mm) prevents the forming of troublesome wrinkles that are difficult to remove.

- The non-woven material is dimensionally stable. That means that the wall mural is not affected by contact with the paste or changes in humidity.

- Due to their high stability, **Moneta** non-woven wall murals can be hung without a problem even over small cracks or bumps in the wall.

All **Moneta** products satisfy the most stringent print quality requirements. The printing technique employed enables a resolution that surpasses the perception of the human eye. No screen is visible. The materials used guarantee high lightfastness and thus no change in colour even when exposed to direct light for longer periods.

The high volume of the non-woven material (250-350 g/m²) makes it sound-absorbing and the room osier. The matt-fibrous surface is discreet, creating a calming ambience. **Moneta** non-woven wall murals are odourless and easy to remove, should you someday wish to take down the wall mural.

MONETA- THE SMART NON-WOVEN WALL MURALS

The materials used contain neither recycled paper nor optical brightening substances. The environmentally friendly printing technique causes no emission of organic compounds. Harmless colours are used so that even indirect aacontact with food creates no problem.
